WEDTF has been registered in Zanzibar in the year 1995 under Society Act 1995 Our Registration number No. 1.

As it is known that AIDS is a global problem, so WEDTF has not been spared. Some of our Clients have been infected so far, and few has been already died, while others are nursing sick relatives at their homes.

Knowing that our clients are good absorbers of new information which is beneficial to their well being. Hence we believe that, it will be very effective to impact HIV/AIDS prevention knowledge and care to them, and through them to the community at large. In disseminating this information successfully we have started a partnership with Zanzibar Women Welfare Trust Fund (ZAWOTE) whose mission is to create a society where all Women benefits equal opportunities and access resource mobilization, allocation, and utilization for the benefit and advancement of Women.

WEDTF and ZAWOTE has a committed team of staff with communication and advocacy skill hence we have no doubt that the task will be done effectively for the benefit of the clients and member of their families.
